

Project Proposal Rubrics

Project Title	0.5	
Project Description and Details	0.5	
Soft Prototyping	1	
System Block Diagram	0.5	
Concept	0.5	
Writing Style & Grammar	0.5	
References	0.5	

Performance Indicator/ Criteria	Level 4: Exemplary	Level 3: Good	Level 2: Developing	Level 1: Unsatisfactory
Project Title	The project title correctly and creatively highlights the scope of the work being carried out in the project.	The project title adequately highlights the scope of the work being carried out in the project.	The project title highlights the scope of the work being carried out in the project but some aspect of the scope is missing.	The project title inadequately highlights the scope of the work being carried out in the project.
Problem Description and Project Details	A comprehensive, coherent, and correct explanation of the problem is provided. It clearly	A convincing explanation of the problem is provided. It is coherent, correct, and sufficiently establishes context.	An adequate explanation or context is provided for the problem but the explanation is incoherent in some places and context	An incorrect, incoherent, and/or flawed explanation is provided for the problem. It does neither include the necessary aspects of the

	establishes context.		establishment is missing.	project nor establishes context.
Soft Prototyping	Creative prototypes were constructed for all assumptions and all features.	Appropriate prototype was constructed to test and validate most critical assumptions and features.	Some of the critical assumptions have been tested but testing of some key assumptions is missing, or the tested assumptions are not critical.	The constructed prototypes are not suitable for testing the critical assumptions.
System Block Diagram	Diagram includes all parts of the design. All inputs and outputs and all the main connections/data flows are correctly defined on the diagram. Diagram is drawn using a correct diagramming tool.	Diagram includes most parts of the design. Most inputs and outputs and most of the main connections/data flows are adequately defined on the diagram. Diagram is drawn using an adequate diagramming tool.	Diagram includes some parts of the design. Some inputs and outputs and some of the main connections/data flows are defined on the diagram. Diagram is drawn using a diagramming tool.	Diagram does not include main parts of the design or totally misses the main parts of the design. None of the inputs and outputs and none of the main connections/data flows are defined on the diagram. Diagram is not drawn using a diagramming tool.
Concept	Two ideas have been	At least one idea is	Some elements of	The ideas presented lack

	presented that demonstrate novelty, appropriate level of detail.	presented in reasonable detail.	the idea(s) are presented but they are vague. An attempt has been made to connect the idea(s) with the established features list.	clarity. They do not connect with the established features list.
Writing Style & Grammar	The report is written in an extraordinary style, the writing tone is formal and highly informative, and the structure is very well-organized. There are no spelling, punctuation, or grammatical errors.	The report is written in an interesting style, the writing tone is informative, and the structure is organized. There are few spelling and punctuation errors, and minor grammatical errors.	The report is written in a style which lacks clarity, the writing tone is informal, and the structure is not organized. There are some spelling, punctuation, and grammatical errors.	The report is written in a vague style, the writing tone is highly informal, and the structure is poorly organized. There are many spelling, punctuation, and grammatical errors which interfere with the meaning.
References	Most references (>90%) are timely and appropriate to the subject	Many references (75%) are timely and appropriate to the subject matter.	Many references (50%) are timely and appropriate to the subject matter.	Few references (25%) are timely and appropriate to the subject matter.

	matter.
