

DLD PROJECT PROPOSAL

*[Ali Asghar Yousuf (ay06993), Muhammad Azeem Haider (mh06858), Musab Sattar (ms06651),
Mohammad Shahid Mahmood(mm06600)]*

Project Idea A: (Main Idea)

An interactive game using an input peripheral i.e., keyboard with various outputs.

Project Title:

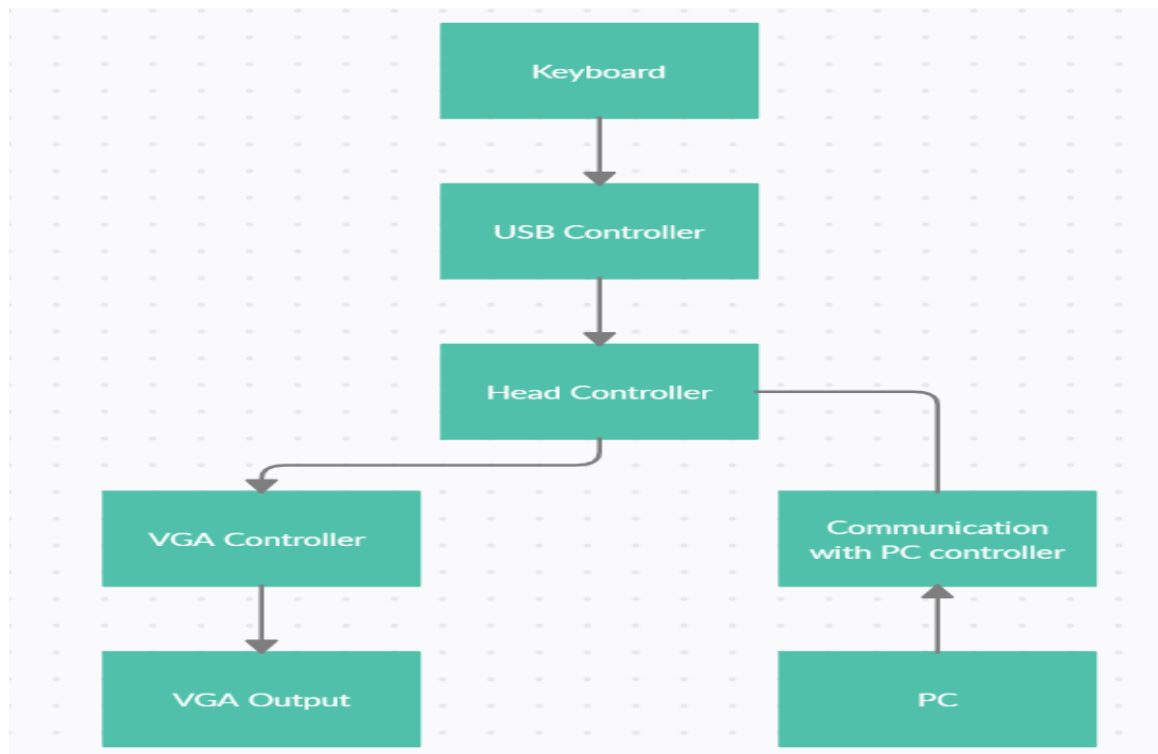

Flappy Bird

Project Description:

Flappy bird is a game that exploded in popularity when it hit the app store and play store. Loving this childhood game from the very beginning of its existence motivated us to try and implement it with our logical learning of this course and experimental practices of the lab.

The project aims to deliver a game that will have a bird that is hovering on the screen. The bird will be moving continuously in one direction while a switch will navigate its movement (high for the up direction and low for down direction). The project will provide a trip down memory for the users. The target users will be users who previously enjoyed this game and still have an interest in the game (these could be everyday smart phone owners

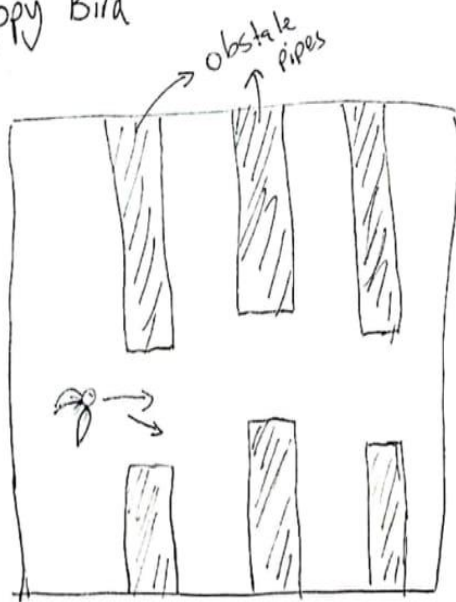

BLOCK DIAGRAMS:

Prototype(s):

Picture 1

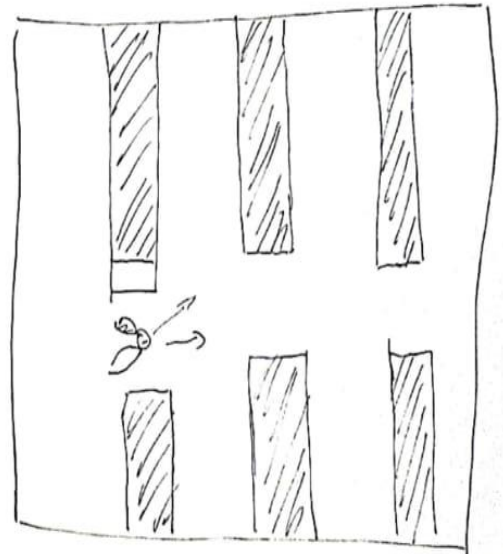

Flappy Bird

input switch 
off on

off input indicates which angle to turn
in this picture it is angled down

Picture 2

input switch 
off on

in this picture the input is on hence
the bird is angled upwards

Project Idea B:

An interactive game using an input peripheral i.e., keyboard with various outputs.

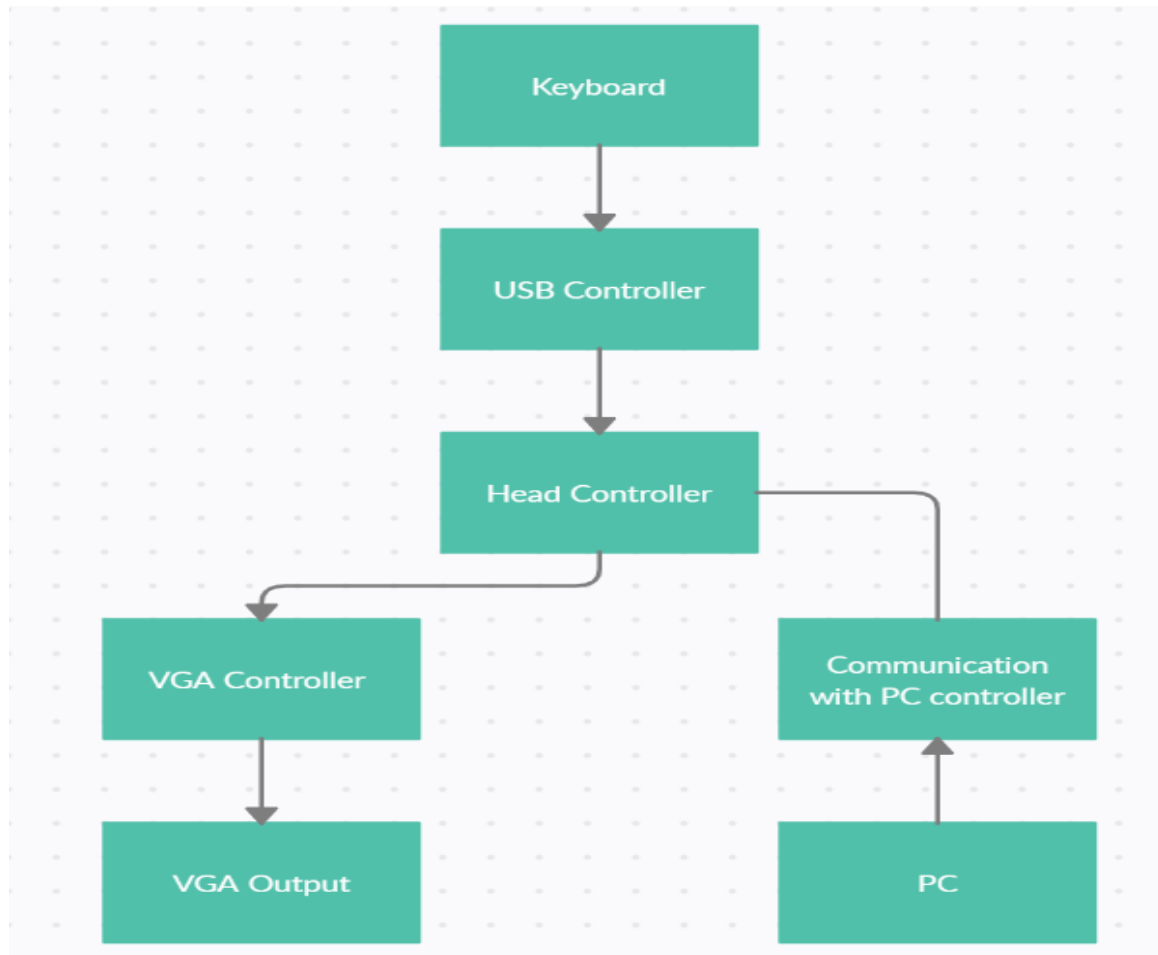

Project Title:

Pinball Game

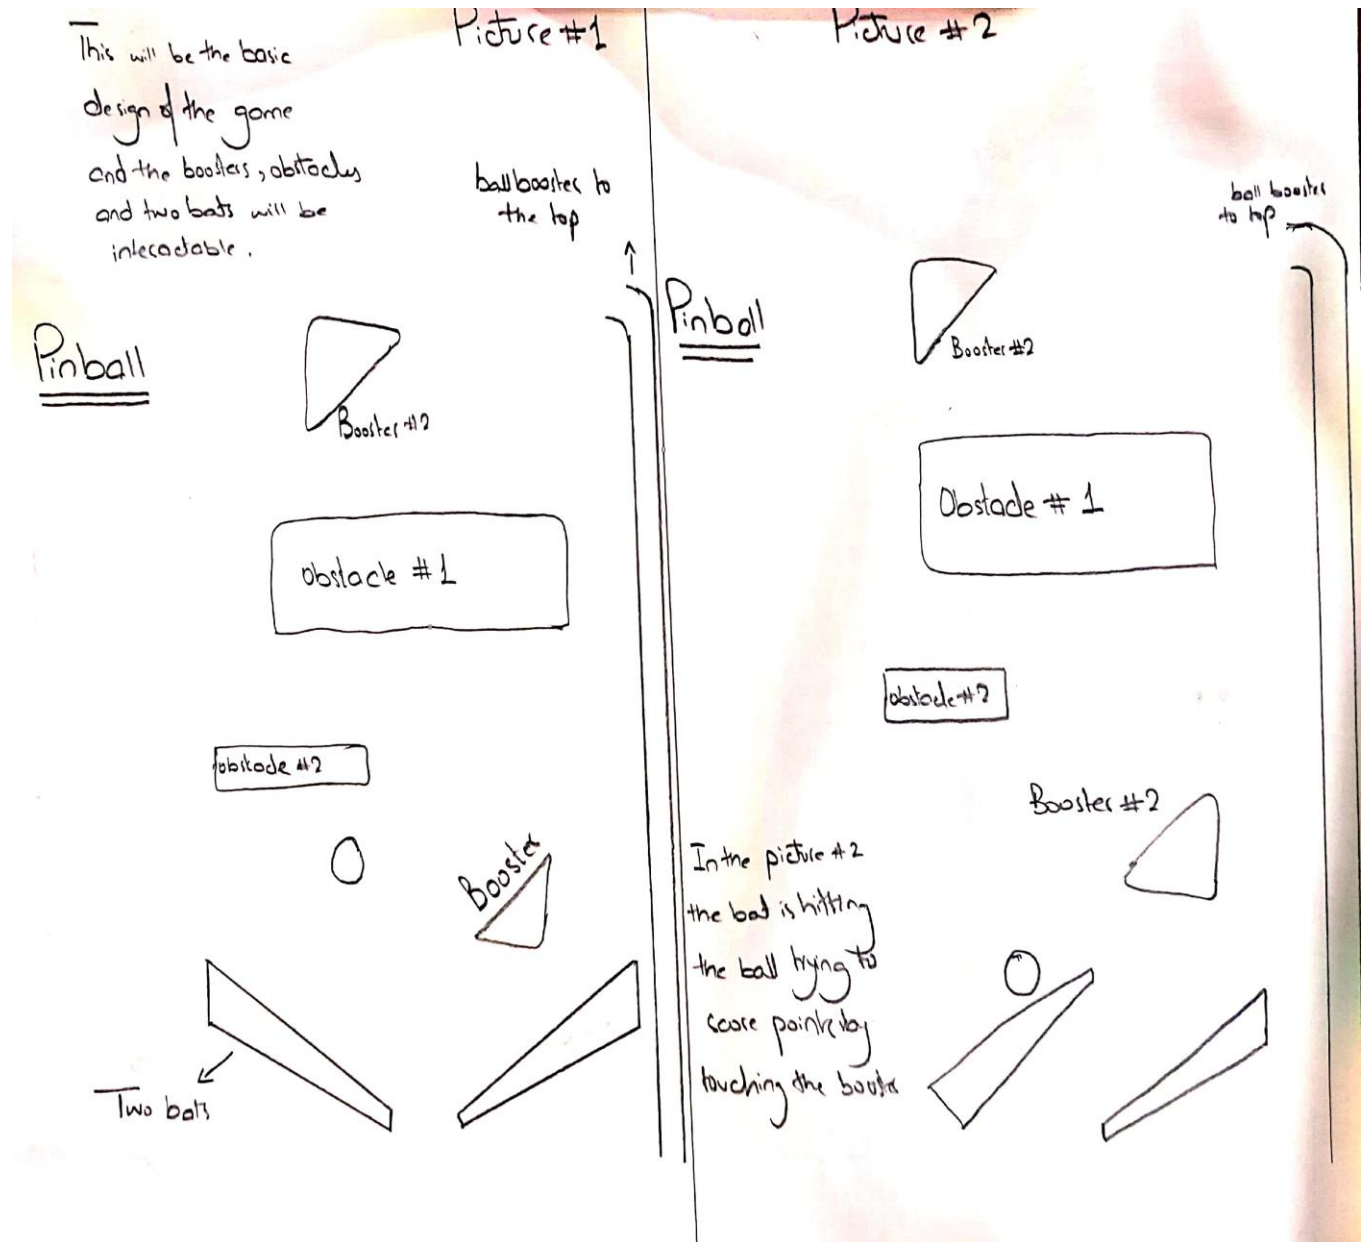

Project Description:

Pinball is a game that most of us played as our first game ever. This was our motivation for choosing pinball as our first project. Pinball is an arcade entertainment machine in which a ball careens around the machine's interior, hitting various lights, bumpers, ramps, and other targets depending on the design. Our system will be a simplified version of this traditional game, having boosters, ramps and a couple of other obstacles. Our target user groups for this project are hardcore gamers that play games as a relaxing activity. Our input peripheral is the keyboard.

BLOCK DIAGRAMS:

Prototype(s):

This is the prototype for our project idea B that is the game of pinball.
