

CT P-Quiz (Critical Thinking: Claims & Arguments)

- **Quiz Type:** Practice Quiz
 - **Total Points:** 17
 - **Questions:** 17
 - **Due Date:** May 16, 2026
-

Question 1 (1 pt)

Critical thinking is ☐ the unsystematic evaluation of beliefs or statements by rational standards. ☐ the systematic evaluations of beliefs or statements by irrational standards. ☐ to criticize and reject every claim. ☒ **the systematic evaluation of beliefs or statements by rational standards.**

Question 2 (1 pt)

A statement or claim ☒ is an assertion that something is or is not the case. ☐ is always true. ☐ is always false. ☐ is always objective.

Question 3 (1 pt)

An objective statement is ☒ a statement that is not made true or false by the speaker or writer's thinking it is true or false. ☐ a statement that made true or false by the speaker or writer's thinking it is true or false. ☐ a deductive statement. ☐ an inductive statement.

Question 4 (1 pt)

"Bruno Mars has swag" is ☐ nonsense. ☒ a subjective claim. ☐ an objective claim. ☐ a biased claim.

Question 5 (1 pt)

Which of the following features do not describe a subjective judgment? Subjective judgments ... ☒ can be mistaken. ☐ are not subject to probability quantifications. ☐ are not the sort of thing for which evidence could be given. ☐ cannot be thought of as supportable by evidence.

Question 6 (1 pt)

An argument ... ☒ consists of a group of statements in which some of them (the premises) are intended to support another of them the conclusion. ☐ is a disagreement. ☐ consists only of premisses. ☐ is a long passage in a text.

Question 7 (1 pt)

The term 'inference' refers to ☐ an inductive argument. ☒ the mental process of reasoning from a premise or premises to a conclusion based on those premises. ☐ a deductive argument. ☐ contextual clues.

Question 8 (1 pt)

Is a selfie an argument? ☐ Yes ☒ No

Question 9 (1 pt)

Is the following statement correct? *"You can always turn an inductive argument with an unstated premise into a deductively valid argument by supplying the right universal premise - a statement that something holds without exception or is true everywhere or in all cases."* ☒ Correct ☐ Incorrect

Question 10 (1 pt)

Which statement best describes the concept of a 'deductive argument'? ☒ An argument intended to provide logically conclusive support for its conclusion. ☐ An argument in which the premises are intended to provide probable, not conclusive, support for its conclusion.

Question 11 (1 pt)

Is the following argument a deductive or an inductive argument? *"All mammals have backbones. Humans are mammals. Therefore, humans have backbones."* ☐ Inductive argument ☒ Deductive argument

Question 12 (1 pt)

Is the following argument a deductive or an inductive argument? *"10% of the smokers develop cancer. 1% of nonsmokers develop cancer. Hence, smoking increases*

the risk of cancer by many (10) times." ☒ Inductive argument ☐ Deductive argument

Question 13 (1 pt)

Is the following statement correct? *"Unlike a deductive argument, the structure of an inductive argument cannot guarantee that the conclusion is true if the premises are true. But the premises can render the conclusion probable, likely, or worthy of acceptance."* ☒

Correct ☐ Incorrect

Question 14 (1 pt)

Which of the following definitions best describes the concept of "generalising from a sample"? ☐ It is a type of argument that asserts or implies cause-and-effect, or, alternatively uses a cause-and-effect claim as a premise in an argument to establish that something happened or is the case. ☐ It is a type of argument that states that something has an attribute because a similar thing has that attribute. ☐ It is a type of argument, in which you conclude that particular members of a population have an attribute because some high proportion of all the population's members have that attribute. ☒ It is a type of argument in which you inductively conclude that all or most or some percentage of all the members of a population have an attribute because all or most or some percentage of the members of a sample of the population have that attribute.

Question 15 (1 pt)

The passage below represents which kind of inductive argument? *"I've liked the majority of Professor's Moore's lecture so far; therefore, probably I will like the majority of all of Professor Moore's lectures."* ☐ Statistical Syllogism ☐ Argument from Analogy

☒ Generalising from a Sample ☐ Causal Argument

Question 16 (1 pt)

The passage below represents which kind of inductive argument? *"The toilet is leaking. It isn't possible for the toilet to leak without damaging the floor. Therefore, the floor is damaged."* ☒ Causal Argument ☐ Argument from Analogy ☐ Statistical Syllogism ☐ Generalising from a Sample

Question 17 (1 pt)

The passage below represents which kind of inductive argument? *"Most days that are hot and humid are days with thunderstorms. It is hot and humid today. Therefore, probably there will be a thunderstorm today."* ☐ Generalising from a Sample ☒ Statistical Syllogism ☐ Argument from Analogy ☐ Causal Argument
