

FRQ P-Quiz (Finding A Research Question)

- **Quiz Type:** Practice Quiz
 - **Total Points:** 21
 - **Questions:** 21
 - **Due Date:** May 10, 2026
-

Question 1 (1 pt)

The constructive worldview is a philosophical view used in ☐ quantitative research ☒ qualitative research ☐ dystopian research ☐ mixed research

Question 2 (1 pt)

The following elements are part of which worldview? - *Understanding (i.e., the belief that individuals seek to understand the world in which they live and work)* - *Multiple participant meanings (i.e., individuals develop subjective meanings of their experiences, which are varied and multiple)* - *Social and historical construction (i.e., the meanings are formed through historical and social norms)* - *Theory generation (i.e., rather than starting with a theory, inquirers generate or inductively develop a theory or pattern of meaning).* ☐ Post-positivism ☐ Transformative worldview ☒ Constructivist worldview ☐ Pragmatic worldview

Question 3 (1 pt)

The following elements are part of which worldview? - *Consequence of actions* - *Problem-centered* - *Pluralistic* - *Real-world practice-oriented* ☐ Post-positivism ☒

Pragmatic worldview ☐ Constructivist worldview ☐ Transformative worldview

Question 4 (1 pt)

The following elements are part of which worldview? - *Political - Power and justice oriented - Collaborative - Change oriented* ☐ Post-positivism ☐ Pragmatic worldview ☒ Transformative worldview ☐ Constructivist worldview

Question 5 (1 pt)

Consider the following methods: - *instrument-based questions - performance data, attitude data, observational data, and census data - statistical analysis - statistical interpretation* They are ... ☒ Quantitative Methods ☐ Qualitative Methods ☐ Logical Methods ☐ Informal/Heuristic Methods

Question 6 (1 pt)

A researcher tests a theory by specifying narrow hypotheses and collecting data to support or refute the hypotheses. The researcher uses an experimental design to assess the attitudes both before and after an experimental treatment. The data are collected on an instrument that measures attitudes, and the information is analyzed using statistical data analysis procedures and hypothesis testing. This approach can best be described as what? ☐ Quantitative Method: Constructivist Worldview ☒ Quantitative Method: Post-positivist Worldview ☐ Qualitative Method: Pragmatic Worldview ☐ Qualitative Method: Transformative Worldview

Question 7 (1 pt)

A researcher seeks to establish the meaning of a phenomenon from participants' views. This means identifying a culture-sharing group and studying how it develops shared patterns of behavior over time (i.e., ethnography). One of the key elements of collecting data in this way is to observe participants' behaviors during their engagement in activities. This approach can best be described as what? ☐

Quantitative Approach: Constructivist Worldview ☐

Quantitative Approach: Transformative Worldview ☒

Qualitative Approach: Constructivist Worldview ☐

Qualitative Approach: Pragmatic Worldview ☐

Question 8 (1 pt)

The following statement describes what kind of research question? *"What is the proportion of resident doctors in the hospital who have mastered ultrasonography as a diagnostic technique?"* ☒ Descriptive research question ☐ Comparative research question ☐ Relationship research question

Question 9 (1 pt)

The following statement describes what kind of research question? *"How does the vitamin D analog 22-Oxacalcitriol mimic the antiproliferative activity of 1,25-Dihydroxyvitamin D in osteosarcoma cells?"* ☐ Descriptive research question ☒ Comparative research question ☐ Relationship research question

Question 10 (1 pt)

The following statement describes what kind of research question? *"Is there a relationship between the number of medical student suicides and the level of medical*

student stress in Japan during the first wave of the COVID-19 pandemic?" ☐ Descriptive research question ☐ Comparative research question ☒ Relationship research question

Question 11 (1 pt)

What kind of research is the following described approach? *Exploring and understanding the meaning of individuals or groups ascribe to a social or human problem. The research process involves emerging questions and procedures, data typically collected in the participant's setting, data analysis inductively building from particulars to general themes, and the researcher making interpretations of the meaning of the data. The final written report has a flexible structure. Those who engage in this form of inquiry use an inductive style, building from data to themes and a focus on individual meaning, and emphasize the importance of reporting the complexity of a situation.* ☒ Qualitative research ☐ Quantitative research ☐ Mixed method research

Question 12 (1 pt)

What kind of research is the following described approach? *The inquiry involves collecting both quantitative and qualitative data, using a specific procedure of design, combining the two forms of data within the design, and drawing conclusions about the insight to emerge from the combined databases.* ☐ Quantitative research ☐ Qualitative research ☒ Mixed methods research

Question 13 (1 pt)

What kind of research is the following described approach? *The inquiry involves*

testing objective theories by examining the relationship among variables or comparing groups. These variables, in turn, can be measured, typically on instruments, so that numerical data can be analyzed using statistical procedures. The final written report has a set structure comprising an introduction, methods, results, and discussion. []

Qualitative research ☒ Quantitative research [] Mixed method research

Question 14 (1 pt)

The following elements are part of which worldview? - *determination - reductionism - empirical observation and measurement - theory verification* ☒ Post-positivism []

Constructivist worldview [] Transformative worldview [] Pragmatic worldview

Question 15 (1 pt)

The researcher places great importance on studying the lives and experiences of diverse groups that have traditionally been marginalized. In studying these diverse groups, the researcher focuses on inequities based on gender, race, ethnicity, disability, sexual orientation, and socioeconomic class that result in asymmetric power relationships. This approach is grounded in which philosophical worldview? []

Post-positivism [] Pragmatic worldview [] Constructivist worldview ☒

Transformative worldview

Question 16 (1 pt)

The following elements describe which research design? - *Experimental and quasi-experimental - Single-subject - Nonexperimental such as surveys - Longitudinal* ☒

Quantitative design [] Qualitative design [] Methods design

Question 17 (1 pt)

The following elements describe which research design? - *Descriptive method* - *Narrative research* - *Phenomenology* - *Grounded theory* - *Ethnography* - *Case study* [] Quantitative design [✓] Qualitative design [] Methods design

Question 18 (1 pt)

The following elements describe which research design? - *Convergent* - *Explanatory sequential* - *Exploratory sequential* - *Complex designs with embedded core designs* [] Quantitative design [] Qualitative design [✓] Methods design

Question 19 (1 pt)

The following elements describe which method? - *Emerging methods* - *Open-ended questions* - *Interview data, observation data, document data, and audiovisual data* - *Text and image analysis* - *Themes, patterns, and interpretation* [] Quantitative methods [] Mixed methods [✓] Qualitative methods

Question 20 (1 pt)

The following elements describe which method? - *Both predetermined and emerging methods* - *Both open- and close-ended questions* - *Multiple forms of data drawing on all possibilities* - *Statistical and text analysis* - *Across databases interpretation* [] Quantitative methods [✓] Mixed methods [] Qualitative methods

Question 21 (1 pt)

The following elements describe which method? - *Predetermined - Instrument-based questions - Performance data, attitude data, observational data, and census data - Statistical analysis - Statistical interpretation* ☒ Quantitative methods ☐ Mixed methods ☐ Qualitative methods
