Question 1 (1 pt)

The mental models or frames (belief systems) are called ... ☒ paradigms ☐ opinions ☐ judgments ☐ claims

Question 2 (1 pt)

Paradigms are often hard to catch because they are ... ☒ implicit ☐ assumed ☐ simple ☐ taken for granted

Question 3 (1 pt)

Scientists might examine research questions through different lenses. The term 'rational lens' refers to ... ☐ looking at social deficiencies. ☐ looking at it from a political point of view. ☒ looking for a rational explanation of the problem.

Question 4 (1 pt)

The following elements best describe which of the paradigms? - *Science or knowledge*

should be restricted to what can be observed or measured. - ... relies exclusively on theories that can be tested. - ... led to empiricism and blind faith in observed data and a rejection of any attempt to extend or reject beyond observable data. ☒ Positivism ☐ Post-Positivism

Question 5 (1 pt)

Ontology refers to ... ☒ our assumptions about how we see the real world. For example, does the world consist mostly of social order or constant change? ☐ to our assumptions about the best way to study the world. For example, should we use an objective or subjective approach to study social reality?

Question 6 (1 pt)

Inductive research is ... ☐ theory-testing research (i.e., the aim is to refine, improve, and extend a theory) ☒ theory-building research.

Question 7 (1 pt)

... research is often conducted in new areas of inquiry, where the goals of the research are: - *To scope out the magnitude or extent of a particular phenomenon, problem, or behaviour;* - *To generate some initial ideas about the phenomenon;* or - *To test the feasibility of undertaking a more extensive study regarding the phenomenon.* ☒ Exploratory (research) ☐ Descriptive (research) ☐ Explanatory (research)

Question 8 (1 pt)

... research seeks explanation of observed phenomena, problems, or behaviours. ☐

Exploratory (research) ☐ Descriptive (research) ☒ Explanatory (research)

Question 9 (1 pt)

... research is directed at making careful observations and detailed documentation of a phenomenon of interest. These observations must be based on the scientific method (i.e., logical, confirmable, repeatable, and scrutinizable), and therefore, are more reliable than causal observations by untrained people. ☐ Exploratory

(research) ☐ Explanatory (research) ☒ Descriptive (research)

Question 10 (1 pt)

The concept 'unit of analysis' refers to ... ☐ hypotheses, theories, and laws. ☐ the scientific method ☒ the person, collective, or object that is the target of the investigation. ☐ to economic organisations.

Question 11 (1 pt)

Operational definitions ... ☐ are constructs, often defined in terms of a synonym. ☒ define the constructs in terms of how they will be empirically measured.

Question 12 (1 pt)

Independent variables are ... ☐ variables that are explained by other variables. ☐ variables that influence the relationship between independent and dependent

variables. ☒ variables that explain other variables. ☐ variables that are not pertinent to explaining a give dependent variable, but may have some impact on the dependent variable.

Question 13 (1 pt)

Moderating variables are ... ☐ variables that explain other variables. ☐ variables that are explained by other variables. ☐ variables that are explained by independent variables while also explaining dependent variables. ☒ variables that influence the relationship between independent and dependent variables.

Question 14 (1 pt)

Control variables are ... ☐ variables that explain other variables. ☐ variables that are explained by other variables. ☐ variables that are explained by independent variables while also explaining dependent variables. ☒ variables that are not pertinent to explaining a given dependent variable, but may have some impact on the dependent variable.

Question 15 (1 pt)

Dependent variables are ... ☐ variables that explain other variables. ☒ variables that are explained by other variables. ☐ variables that are explained by independent variables while also explaining dependent variables. ☐ variables that influence the relationship between independent and dependent variables.

Question 16 (1 pt)

Mediating variables are ... ☐ variables that are explained by other variables. ☐ variables that explain other variables. ☒ variables that are explained by independent variables while also explaining dependent variables. ☐ variables that influence the relationship between independent and dependent variables.
